

Enterprise Risk & Strategy

What We Do

Enterprise Risk & Strategy, at its core, is about identifying and leveraging opportunities that support your strategic objectives, as well as identifying and controlling the exposures that could undermine them.

This requires a melding of holistic strategic planning and risk management competencies to create a synergistic risk intelligence. And because no two operations are alike, we utilize our extensive expertise in process improvement, program management, strategic and risk planning methodologies to develop the framework and programs that fit your specific needs.

“No Industry is Immune from the Digital Revolution.”

Studies show that organizations achieving digital innovation **outperform their competitors** in revenue generation and profitability. This transformation is inevitable if you want to succeed, but the path fraught with risk. Our team assists our clients in mitigating these efforts by:

Primary NAICS Code: 541519 - Other Computer Related Services

Secondary NAICS codes: 541330, 541511, 541512, 541513, 541611, 541614, 541618, 541690, 541990, 561110, 561210, 561990, 611430

- Supply Chain/Vendor Risk Assessment
- Business Case Validation & Development
- Consolidation & Restructuring
- KPI and KRI Development
- Training & Workshop Facilitation
- GRC Gap Analysis
- Insurance Gap Analysis
- Business Continuity Planning & Support

Striking the Balance

Traditional risk management and strategic planning programs have been plagued with form-over-function flaws, expensive and labor-intensive with little to show in ROI, and often falling to wayside because the end result lacked operational feasibility. We know operations as well as we know risk, so we can strike that balance. Our unique approach helps to bridge the gap between line personnel and the executive suite, aligning expectations and performance while identifying process weaknesses that slow down your team and get in the way of achieving organizational goals. We start by focusing on more than just traditional risk programs and exposure evaluation, we incorporate external opportunity and threat profiles, emerging risk and market factors, internal program weaknesses, and alignment of operational objectives with strategic imperatives. Our process results in more than just a "final report" deliverable, as our team creates actionable risk intelligence.

Protecting Your Operation

Regulatory and compliance becomes more burdensome each year, and cyber-attacks are increasing by the day. Managing these threats is far from sexy, but failing to do so can literally mean "game over" for your organization. Through targeted assessments Jadin Tech drills down to identify critical gaps in governance, risk and compliance programs, capture and retention strategies, change management programs, continuity planning and field operations. Our business continuity framework includes crisis communication, network disaster recovery, emergency response and operational business resumption. We assist in developing crucial Governance, Risk & Compliance (GRC) frameworks relevant to your industry, creating the procedural infrastructure and reporting dashboards to track Key Performance and Risk Indicators that will provide assurance that you are on track.

Emerging & Expanding Industry

For our clients who are launching new technology, expanding operations geographically, or entering into new or emerging markets, our strategy and implementation support will not only deliver evaluation of external risks and opportunities, but will assess internal strengths and weaknesses (people, process, tools) to ensure that the competencies necessary to fulfill your vision exist. We can help you understand the full breadth and depth of risk within your capture and retention, marketing, and implementation strategies. Using an integrated approach to root out potential financial, operational, strategic, regulatory and market exposures, we enhance proposals and business cases with a holistic review of both opportunity and risk. These services support mature organizations as well as burgeoning start-ups ready to operate with increased sophistication.

Why Jadin Tech?

At Jadin Tech, we deliver enterprise value through our specialized risk management service suite. Our dynamically flexible business model offers deep expertise in areas most critical to your organization's success at a highly competitive cost. We excel in providing implementation solutions for evolving cutting-edge industries, and we know how to identify, scope and manage emerging risks inherent to digital innovation. Our professionals are not only proven experts in their fields, they are management leaders who understand the synergy achieved when the right expertise and the right tools are applied to organizational challenges.

"Intelligent Business Partners providing Risk Intelligent Solutions."
