

MANNED AND UNMANNED AVIATION SERVICES

The landscape of commercial aviation is evolving at an exponential rate due to the integration of Unmanned Aircraft Systems (UAS) into the National Airspace System.

The goal of Jadin Tech's Aviation Services Team is to provide clients with the tools required to manage Government regulations, technology advances, development of UAS simulation systems, airspace coordination, asset protection, and disaster recovery planning.

Our team has successfully developed one of the United States original FAA UAS test sites and obtained a Section 333 exemption allowing for commercial UAS operations in 2015.

Jadin Tech's Aviation Services Team incorporates all elements of Aeronautical Decision-Making into a comprehensive risk management framework that has reduced risk exposure for our clients. We will tailor our risk services to your needs to achieve an acceptable level of risk at an affordable cost.

AVIATION SERVICES CAPABILITIES

- Unmanned Aircraft Systems Consulting
- UAS Airspace Integration
- Range Management & Oversight
- Safety Management System Support & Training
- Research and Development
- Test and Evaluation
- Standards Validation and Regulatory Compliance
- Systems Engineering & Technical Assistance
- Center of Excellence / Project Management Office
- Comprehensive Risk Management
- Simulation & Training
- Aircraft Mishap Investigations
- Disaster Recovery & Response
- Asset Identification, Valuing & Protection
- IT and Cyber Services
- Counter UAS Operations
