

Base Logistics Support: Management & Sustainment Services

Alaska Native Corporation | SBA 8(a) Certified Minority Small Disadvantaged Business

Jadin Tech, LLC provides logistics management and sustainment support services at U.S military bases and remote training camps. Our work includes standing-up, operating, and maintaining real property and temporary facilities; operating and maintaining transportation and supply services; and the supervising all materials, supplies, labor and equipment.

Jadin Tech's expertise, responsiveness and flexibility can help you optimize performance and reduce your total cost of ownership. We apply AI and ML to predict requirements and provision supplies and services in advance of need to minimize and eliminate downtimes. We have the demonstrated capability to meet current and evolving logistics requirements for assuring that equipment and systems have end-to-end support for operational/combat readiness.

Jadin Tech provides logistics services designed to optimize equipment and system readiness throughout their service life, including asset reutilization for the lowest possible life cycle cost. With an emphasis on maintaining and supporting the modernization of equipment, our services comply with government and military directives and established industry standards.
